

2023 Bareroot Fruit Tree Order Form

Name _____ Phone number _____

E-mail Address _____

The varieties below are available for us to order from our supplier, Bailey Nurseries. The GREY highlighted are those which we plan to order. You can order any quantity you'd like.

The other varieties can be ordered if we have enough interest. Our vendor requires a minimum of 5 per variety. We are happy to order additional varieties if have pre-sold at least 3 of the 5. Even if you don't need 3, you can submit your request – maybe someone else is requesting the same one!

Things to note:

- Fruit Trees will be \$33 each unless otherwise noted. If we receive an increase from our supplier, our cost could increase. Special orders could have an increased cost depending upon rootstock and prices. In either of these scenarios, customer will be contacted for approval.
- 2023 Bare Root Weekend is scheduled for March 30-April 1. You should be available or make arrangements for your trees to be picked up that weekend. Any reserved items not picked up by April 5 will be potted and released for general sale.
- Trees are semi-dwarf and Apple and Pears are on M-7 rootstock unless otherwise noted. 9/16" caliper is requested.
- We will place our order now. Unfortunately, there is a chance that we will not get everything we request. Confirmations may not be received from Bailey Nursery until January. We will assume all is good but if we find out there is a problem with your request, you will be notified as soon as possible.
- Bareroot product comes with a 30 day guarantee. If your product does not break dormancy you will be given a replacement if available or a store credit.

Early Fruit Request Form is DUE July 18th.
