

## Bareroot Fruit Variety Descriptions

<b>Tree/ Plant</b>	<b>Size</b>	<b>Bloom Date</b>	<b>Description</b>
Empire Apple	11/16	Mid Season Late Sept/Early Oct	(McIntosh & Delicious Red) Attractive, medium-sized fruit with red blushed skin. Sweet flavor and firm texture. Very good fresh eating apple. Excellent pollen source for other varieties. Resistant to mildew and fireblight. Prone to biennial bearing. Requires pollinator.
Honeycrisp Apple	9/16	Mid Season Late Sept	Exceptionally crisp and juicy. Flavor is sweet but well balanced. Excellent storage life, up to 7 months. Requires pollinator.
Liberty Apple	11/16	Mid Season Late Sept	Productive variety selected for its resistance to apple scab and cedar apple rust. Crisp and juicy with a sprightly flavor. Keeps well into February. Does not require fungicide sprays. Requires pollinator.
Granny Smith Apple	11/16	Late Season Late Oct/Early Nov	Very late maturing, late keeping, dual purpose apple. Flesh is hard, crisp and juicy with excellent tart flavor. Fruit is grass green and shiny. Good pollinator for Golden/Red Delicious and Jonathan. Requires pollinator.
Delicious Golden Apple	11/16	Late Season Mid Oct	Medium size, round, bright golden yellow. Firm, crisp and juicy, good for eating and cooking. Late maturing. Requires pollinator.
Moongold Apricot	7/8	Late July	1.75" freestone, gold fruit that is sweet and slightly acidic. Eat fresh or use in sauce or jam. Moderate grower 10-15' tall 12-18' spread. Requires a pollinator.
Scout Apricot	7/8	Early August	1.5" fruit is bronze-gold color, blushed with red. Good for eating, canning and jam. 10-15' tall 12-18' spread. Self-fertile but more productive with a pollinator.
Bosc Pear	11/16	Bloom: May Ripe: Early Oct	Large, high quality, russeted fruit. Tender, juicy, yellowish flesh with smooth texture. Good fresh and for canning. Fruit matures in early October. Vigorous grower. Bartlett is a good pollinator. Requires pollinator.
Bartlett Pear	11/16	Bloom: May Ripe: September	Large size, golden yellow, wonderful quality. Buttery, juicy, highly flavored fruit. Excellent for eating fresh or canning. Vigorous grower and bears young. Bosc is a good pollinator. Pollinator required.
Frost® Peach	9/16	Bloom: May Ripe: Late July	Showy pink flowers in the spring bear yellow freestone fruit with a slight blush, ripen mid-season. Excellent for fresh eating or canning. An extremely vigorous and productive tree does best with regular pruning and thinning. Self-fruitful and resistant to peach leaf curl.
Redhaven Peach	11/16	Bloom: Early May Ripe: Mid July	One of the finest early peaches. Colors a beautiful red and golden yellow. Flesh is firm, smooth textured and fine flavored. Fruit is medium size, round, uniform and appealing. Good for freexing, canning and shipping. Disease resistant. One of the hardier peaches. Fruit sets heavily, must be thinned to reach size. Self-fruitful.

## Bareroot Fruit Variety Descriptions

Polly Peach	9/16	Bloom: Early May Ripe: Mid July	White fleshed freestone variety has a slight crimson blush blooms early spring with red pink flowers. Excellent flavor and high-quality fruit with sweet flavor and juicy texture. A good variety for home orchards. Self-fruitful.
